SUMMARY

Data Science undergraduate with hands-on experience building full-stack and AI-powered applications. Developed systems including an invoice prediction platform, an LLM-based YouTube summarization tool, and a data-driven inventory management system. Skilled in Python, Java, and data pipelines, with a focus on scalable, real-world solutions and automation.

EDUCATION

K.I.T.'s College of Engineering <i>B.Tech — Computer Science & Engineering (Data Science) CGPA: 8.2+</i>	Kolhapur, Maharashtra 2024 – 2027
ICRE, Gargoti <i>Diploma (MSBTE) Marks: 90.23 %</i>	Kolhapur, Maharashtra 2021 – 2024

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, HTML/CSS
Frameworks: FastAPI, Flask, Node.js, Streamlit, Tailwind CSS
Data & Databases: Pandas, NumPy, MongoDB, MySQL
DevOps & Tools: Git, Power Bi, Tableau

PROJECTS

ML Model Monitoring & Drift Detection (V1 + V2) | *FastAPI, Node.js, React, SHAP, Docker*

- Built a system to detect data and concept drift using statistical methods.
- Designed a risk scoring model using SHAP explainability.
- Achieved high accuracy (F1-score 1.0) across drift scenarios.
- Added automated retraining and model comparison (V2).

QuickBill — Omni-Channel Invoice Management Platform | *Node.js, React Native, Flask, MongoDB*

- Built a full-stack invoice management system using Node.js, React, and MongoDB.
- Developed an ML microservice to predict invoice payment dates.
- Implemented JWT authentication and GST-based PDF invoice generation.
- Created real-time dashboards for tracking invoices and revenue.

TubeDigest AI – YouTube Summarization & Sentiment Analysis System — *Python, NLP, LLMs, Streamlit*

- Built an LLM-based system to summarize YouTube videos and generate insights.
- Used youtube-transcript-api for transcript extraction and chunking for large text.
- Integrated Llama model for summarization and sentiment scoring.
- Developed a Streamlit dashboard for visualization.

Data-Driven Nursery Inventory and Customer Interaction System — *JavaScript, Data Processing, Google Sheets API*

- Developed a Google Sheets-based inventory system for real-time data management.
- Built a CSV data pipeline (PapaParse) for data processing and display.
- Enabled Google Forms integration for easy data updates.
- Added WhatsApp-based ordering system for customer interaction.
